Workers Perform Storm Clean Up While SAPN Move to Undermine the Workers Industry

The values of the Workers and the values of the EMG were on show during the storm that went through South Australia on the 25th of May 2021.

While all the Workers of SA Power Networks banded together to do everything they could to put the lights back on for South Australians, their employer, SA Power Networks moved further down the path to undermine job security, wages and conditions in the Workers Industry.

SA Power Networks Workers go above and beyond the call of duty every time a weather event happens in South Australia. They stand alone against destruction that weather events bring on to the South Australian electricity grid, even while their employer attacks their job security.

Every South Australian should be questioning why the Executive Management Group at SA Power Networks do not value the service the Workers deliver to the community. Why the Executive Management Group want to hurt the Workers, and the families of Workers, who deliver the profits for the business. The answer is an unending appetite for profit for their offshore shareholders.

SA Power Networks/Enerven plan to cut wage rates and conditions for new employees by 20%.

**This will undermine every current Worker of SA Power Networks. It will create a 2-tiered wage system which will start a race to the bottom.
The industry would never recover from this.**

It's time for every Worker to be honest with themselves and their families. If you are happy with being undercut by your own Executive Management Group, then continue as you are and be happy in your workplace. If you aren't happy about your Executive Management Team undermining your wages, conditions and future. Voice your concerns to your leader, let them know you are not happy and put everything you can into the Industrial Action that is ongoing to protect your Industry. What you do and say in the workplace matters! Don't ignore this threat until it's too late!

SAME WORK, LESS PAY, WE SAY, NO WAY!
